## Welcome to the 2017 William F. Slagle Dental Meeting

The William F. Slagle Dental Meeting is one of The University of Tennessee College of Dentistry's greatest traditions.

The Slagle Dental Meeting is committed to offering extensive continuing education courses, commercial exhibits, and additional educational programs advancing the growth and development of the dental profession. The Planning Committee, UT Dentistry Alumni Association, and College of Dentistry have worked diligently to present a program that honors the meeting's legacy by showcasing the highest caliber continuing education speakers. Throughout its history, the meeting has provided more than two million dollars in proceeds directly to the UT College of Dentistry. Your valued participation helps enhance the dental school experience for current and future students. When I think about the upcoming plans for the college and its dental students I am proud to be an alumnus of UTHSC College of Dentistry, and I am pleased to serve with this great group of alumni.

If you have not traveled back to visit in some time, I encourage you to do so by attending the 2017 William F. Slagle Dental Meeting. Memphis is a wonderful city with a rich history and much to offer. You will see many things that are familiar and a number of things that have changed. Reach out to a fellow dental friend and invite them along.

We thank you for your continued involvement and look forward to seeing you in March!

Sincerely,

Walter Gene Jines, DDS '75

President, Dentistry Alumni Association Board of Trustees

## Mission Statement

The mission of the William F. Slagle Dental Meeting is to advance the delivery of quality dental care by providing the dental team with a premier educational opportunity. In accordance with this mission, the William F. Slagle Dental Meeting is committed to offering extensive continuing education courses, commercial exhibits, and additional educational programs advancing the growth and development of the dental profession.

The William F. Slagle Dental Meeting is sponsored by the University of Tennessee Health Science Center, College of Dentistry Alumni Association. All profits from the William F. Slagle Dental Meeting are used to support dental education programs at the University of Tennessee. Thank you for your support!

## Friday Welcome Party at BB Kings on Beale Street

Enjoy Memphis Style Snacks, Cash Bar, Prizes  
and an Opportunity to Connect with your Peers  
and Explore Downtown Memphis.

*If you choose to stay downtown for dinner & Memphis music, there  
is no need to reserve a seat on the shuttle bus. Ample parking near  
BB Kings. Dinner reservations are strongly recommended ASAP!*

# General Information

## Online Registration

Online registration will be open until, February 21, 2017. We encourage you to register early and take advantage of the discounted fee for registration by February 14, 2017. Advance registration for all programs is strongly encouraged and appreciated. Check-in for the William F. Slagle Dental Meeting begins Thursday afternoon at the Hilton Hotel and will continue all day Friday, Saturday and Sunday morning. All information, name tags, and meal tickets will be held for pick-up at the registration desk. Your registration fee covers your choice of sessions unless otherwise noted, Friday and Saturday lunch, refreshment breaks, continuing education credit, and admission to the Welcome Party and exhibit booths.

Go to [www.slagledentalmeeting.com](http://www.slagledentalmeeting.com) to register online.

## Cancellation Policy

In order to ensure adequate arrangements for courses, food, and other events, no refunds will be given after February 21, 2017. Please submit a written request by email to UT Conferences (conferences@UTK.edu). A \$30 processing fee will be charged for each cancellation processed. Refund checks will be mailed within three weeks of adjournment of the William F. Slagle Dental Meeting. For more details, call toll-free (877) 216-0009.

## Hotel Accommodations & Services

Please make your hotel reservations by phoning the Hilton Memphis at (901) 684-6664 or toll free at (800) 445-8667. You must identify yourself as a participant of the William F. Slagle Dental Meeting to receive the special rate of \$129 single/double. All room reservations must be made by January 30, 2017. Hotel confirmation will be sent from the Hilton Memphis. The hotel provides free shuttle service from the Memphis International Airport. **Please note:** The William F. Slagle Dental Meeting has been designated a non-smoking conference. A smoking area is provided at the Lakeside exit of the conference venue.

## Location

The Hilton is conveniently located off Interstate 240 and Poplar Avenue in one of Memphis' most upscale and residential areas. It is 20 minutes from the Memphis International Airport.

939 Ridge Lake Blvd.  
Memphis, TN 38120  
(901) 684-6664 or (800) 445-8667

## Continuing Education Credit

The formal continuing education programs of The University of Tennessee Health Science Center College of Dentistry are accepted by AGD for Fellowship/Mastership credit. The current term of acceptance extends from 11/01/2015 through 12/31/2019. Provider ID #146050

The University of Tennessee Health Science Center College of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. The current term of approval extends from November 2015 to December 2019.

Courses presented are acceptable by those states that recognize the ADA (CERP) approved and AGD accepted providers.

Upon completion of the course each participant will receive a certificate of completion, which includes the name, date of the course, and the credit earned.

Continuing education courses that are presented cover all aspects of the practice of Dentistry including new knowledge that may not be widely accepted by the profession. In so doing, some presentations may include controversial material or commercial reference. Please be aware that the presentation of such course material should not be considered as an endorsement or approval of a particular philosophy, product, or procedure.

The University of Tennessee Health Science Center College of Dentistry designates this activity for up to 19 continuing education credits. Up to 19 credit hours may be earned by attending the maximum number of courses, (16 hours), mini-sessions, (2 hours), and breakfast with faculty, (1 hour).

## Accommodations for Disabilities or Dietary Requirements

If you require special accommodations for a disability or have dietary restrictions, please notify the UTHSC College of Dentistry no later than February 20, 2017. Call (877) 216-0009.

# General Information

## Exhibit Hall

The exhibit hall will be open Friday from 7:30 am to 5:00 pm, and Saturday from 7:30 am to 2:00 pm. The new design features coffee break stations inside the hall, CE information desk and raffle drawings for an impressive array of prizes in the Exhibit Hall at 1:15 pm on Friday. The exhibit hall has become an important part of our annual event. Please support our exhibitors by placing orders for your office while at the William F. Slagle Dental Meeting.

## UT Dental Student Sponsorship

Sponsor a current UT College of Dentistry student to attend this year's William F. Slagle Dental Meeting. Your \$75 sponsorship will allow a student the opportunity to participate in the courses and network with dental professionals. Simply indicate the number of students you would like to sponsor when registering online. Your support is greatly appreciated.

# Alumni Events

## Friday, March 3, 7:15–8:15 am

### Women's Dentistry Alumni Breakfast

Make plans to join your fellow UT College of Dentistry grads for a light breakfast to learn more about our planned Special Needs Clinic. Remarks will begin at 7:40 am. It's a perfect time to meet our campaign co-chairs — Dr. Ruth Bailey, Dr. Jeannie Beauchamp, and Dr. Terryl Propper — and learn how you can become involved in this important project. Call (901) 448-3023 to reserve your spot.

## Saturday, March 4, 5–7 pm

### Class Social Cocktail Reception

Join your fellow College of Dentistry alumni 33 floors above the beautiful scenery of East Memphis for the class reunion cocktail reception in the Tower Center. This event is perfect for meeting up with your classmates before your reunion dinner on Saturday evening.

Heavy hors d'oeuvres and cocktails will be served at this special celebration. The Tower Center is located in Clark Tower, 5100 Poplar Ave., Memphis, TN 38137. Register at [www.uthscalumni.com/DentistryWeekend2017](http://www.uthscalumni.com/DentistryWeekend2017) to reserve your spot. The cost is \$15 per person.

## Friday, March 3, 11:30 am–1:15 pm

### UT Alumni Awards Luncheon

Make plans to join your classmates and fellow UT grads as we honor the College of Dentistry 2017 alumni awards recipients: DeWayne C. McCamish, DDS, MS '70 and Carl L. Sebelius, DDS '64 recipients of the Outstanding Alumnus Award; William F. Alfonso, DDS '77, recipient of the Distinguished Service Award; and Nathan Cory Glenn, DDS '08, recipient of the Recent Alumnus Award. Chancellor Steve Schwab and Dean Timothy Hottel will also be a part of this special event.

Special seating has been arranged for UT Alumni to attend this Awards and Reunion Luncheon and is included in your registration fee. Additional lunch tickets may be purchased for guests at \$30 each. Please purchase these tickets in advance online when you register for the meeting.

Please note: The Friday Awards Luncheon for UT Alumni and their guests will be held in Ballroom A. (Lunch for non-alumni will be served in Rooks Restaurant and on Director's Row). Call (877) 216-0009 for more details.

## Saturday, March 4, 7 pm

### UT Class Reunion Dinners

*Coordinated by Individual Classes and UT Alumni Office*

How many of your classmates have you seen since you graduated? This is the perfect time to renew acquaintances.

The classes of 1967, 1977, 1987, 1992, 1997 and 2007 will be celebrating reunions. To find out if your class is planning a special activity, check out the Dentistry Alumni Weekend website at:

[www.uthscalumni.com/DentistryWeekend2017](http://www.uthscalumni.com/DentistryWeekend2017)

or phone the UT Alumni Office at (901) 448-5516 or (800) 733-0482, or email Kristin Attaway at [kattaway@utfi.org](mailto:kattaway@utfi.org). **Dentistry Alumni Weekend registration opens on Friday, December 16.**

*Sponsored by Henry Schein*

# FRIDAY, MARCH 3

## Oral Sedation Made Easy to Swallow

8:00 am – 12:00 pm

Course Code: 002AM / 4 hours CE

Sedation and analgesia are frequently administered to patients in-office to relieve pain, discomfort and anxiety associated with dentistry. This four-hour course offers a comprehensive look at the science of oral sedation for both children and adults. Essential components that will be reviewed include: pharmacology of commonly used oral sedative agents, appropriate protocols and safety provisions for planning an oral sedation, monitoring and recovery, the recognition and management of airway problems, and emergency management of adverse events. This course is designed to provide reinforcement of recognized standards for administering moderate sedation in order to maximize the benefits of oral sedation to the patient while minimizing risks to patient safety. The target audiences for this course are pediatric dentists utilizing oral sedation and dentists administering oral sedatives in an effort to obtain moderate sedation in adults.

*This course provides the required 4 hours of CE for recertification.*

### LEARNING OBJECTIVES

- Define the levels of sedation
- Categorize patients who are candidates for oral sedation
- Compare the risks and benefits of the oral sedative medications
- Describe the emergency management protocol of a patient experiencing respiratory depression from sedative medications
- Have an understanding of the required monitoring equipment

This course is also offered at 12:45 pm.

Use Course Code: 002PM.

### Larry Weeda, Jr., DDS

Larry Weeda, Jr., DDS, Professor and Chairman of the Department of Oral and Maxillofacial Surgery and past Director of the Residency Program in Oral and Maxillofacial Surgery joined the faculty of the University of Tennessee College of Dentistry in January of 1998. He is a graduate of the University of Missouri-Kansas City College of Dentistry. He received his training in oral and maxillofacial surgery at the Naval Regional Medical Center in Portsmouth, Virginia and retired from the Navy with the rank of Captain in 1998 after 27 years of service.

### Martha Wells, DMD, MS

Dr. Wells is an Associate Professor and the Program Director of Pediatric Dentistry at the University of Tennessee Health Science Center. She is a graduate of The Dental College of Georgia and completed her specialty training and Master of Science at The Ohio State University. She has had projects published in the Journal of the American Dental Association, the Journal of Pediatric Dentistry, and the International Journal of Pediatric Dentistry. Dr. Wells is an editor of the textbook *Pediatric Dentistry: Infancy through Adolescence*, 6th edition. She also serves on the American Board of Pediatric Dentistry's Examination Committee.

Required Courses  
for Licensure Offered  
Two Days at  
William F. Slagle  
Dental Meeting

## **ORANGE 5 - TRAILBLAZERS PROGRAM (Recent Grads 2012-2016)**

### **Attract New Patients: Grow Your Practice Using Social Media Marketing**

8:30 – 11:30 am

Course Code: 003 / 3 hours CE

**Sponsored by Henry Schein**

Progressive dental practices use social media marketing to attract new patients, raise top-of-mind awareness and referrals and strengthen relationships with patients. But, effective social media isn't something you "have"—it's something that you "do"! Remarkable, share-worthy social media content helps with your complete digital marketing strategy—including SEO. Social media is no longer an adjunct to some other marketing plan. How do you navigate and benefit from this dynamic environment with the limited amount of time and resources you have to spend on marketing?

#### **LEARNING OBJECTIVES**

- Find clarity in the relationships between various digital marketing tools and strategies, including your current website—even if you're just getting started
- Gain decision making confidence about what you can do and when you should consider out-sourced help
- Understand why social media is so critical today for search engine optimization

**Jack Hadley**

Jack Hadley teaches social media marketing to MBA students at Brigham Young University's Marriott School of Management in Provo, Utah. He is also a founding partner at My Social Practice, an agency that provides social media marketing ideas, content, strategy, and support to dental practices worldwide. Jack is an award-winning copywriter and former ad agency Creative Director, who is frequently asked to address dental groups about digital marketing strategies and social media effectiveness.

- Learn why reviews on Google and Yelp are so important for practice growth
- Learn how to effectively combine marketing inside your practice with what happens online
- Learn how to "sell" dental services without selling dental services
- Start creating content that engages patients and builds trust
- Utilize examples and successful case studies to grow your own practice
- Discover ways to involve your team members in your digital marketing
- Create a simple plan for becoming consistent without having it consume too much valuable time

New This Year! Orange 5-Trailblazers, creative programs designed especially for dentists their first five years out. The programs' goals are to introduce topics and address concerns faced by this population of dentists, to feature trendsetting topics in the field of dentistry and learn from top educators and mentors on what it takes to not only build a successful business, but how to become a leader in health care within your community.

Don't miss these opportunities to join in and connect with your fellow peers:

**Kick-off Breakfast**  
**Friday, 7:15 am**

# FRIDAY, MARCH 3

## Oral Surgery for the General Dentist: Faster, Easier, and More Predictable

8:30 am – 4:30 pm

Course Code: 004 / 6 hours CE

Many extractions look easy but can soon become difficult, time consuming, and lead to problems. This course reviews the best techniques and instruments to remove “surgical” extractions easily and quickly while conserving bone. It makes exodontia more enjoyable and predictable so it can be performed with greater confidence and less stress. Dr. Koerner presents an algorithmic process that progresses “by the numbers” until the extraction is complete. If one thing doesn’t work, try the next one. It covers multiple extractions with alveoplasty and preventing complications such as sinus misadventures, excessive bleeding, and preventing tuberosity fractures.

### LEARNING OBJECTIVES

- More easily do “surgical” or difficult extractions that are frequently encountered in general practice
- Prevent and/or manage complications that can occur during or after oral surgery
- More easily recognize problem cases that may need referral
- Perform oral surgery more quickly and with less stress

### Karl R. Koerner, DDS, MS

Dr. Koerner is an Adjunct Professor of Oral Surgery at Roseman University in Utah. He has presented hundreds of didactic and participation courses to GPs over the last 20 years. He is the author of many articles, has authored or co-authored four books on surgery, and has made several surgery DVDs with Dr. Gordon Christensen. He is a general dentist trained in the Army with a current practice of only oral surgery. In 2010, he received the National AGD's Weclew award for his contributions to dentistry and dental education. Dr. Koerner is past president of the Utah Dental Association.

## New This Year!

All “tickets” for Seminars, Lunches, Welcome Party & Shuttle bus will be on the reverse side of your name badge. Raffle tickets will be in your registration envelope as in past years.

## **Be Not Afraid! Treating Xerostomia, Oral Cancer, and ORN!**

8:30 am – 4:30 pm

Course Code: 005 / 6 hours CE

Dr. Ash has established himself as a dental clinician among some of the best medical professionals treating head and neck cancer today. As a dental professional he has dedicated his talents to increasing and enhancing each patient's quality of life. With years of experience treating severe Xerostomia and dental caries following cancer therapy, Dr. Ash has seen it all!

Learn current screening, staging, and treatment for the oral cancer patient, along with prevention of fibrosis and the latest on HPV. Participants will learn which drugs induce ONJ along with the ability to properly diagnose and treat osteoradionecrosis. Learn the major causes of Xerostomia and how to treat its' harmful effects.

Dr. Ash has established himself in the medical community and achieved what very few dentists ever can in a private practice setting. Establish yourself in the medical community and discover the power of a multidisciplinary team approach to patient care!

**Kyle Ash, DMD**

Dr. Kyle Ash is the former owner of two separate private dental practices. He is the founder of South Texas Dental Oncology and current President of the International Society for Preventive Dentistry and Medicine (ISPDM). In addition to his current private practice dedicated to the treatment of individuals suffering from head and neck cancer, he participates in a weekly multidisciplinary head and neck tumor board. Dr. Ash is a 'key opinion leader' in the field of dental oncology lecturing both nationally and internationally to all health professionals. Dr. Ash has a profound passion for oral systemic disease prevention and enhanced quality of life.

## Management of Common Esthetic Dilemmas: An Interdisciplinary Approach

8:30 am – 4:30 am

Course Code: 006 / 6 hours CE

Sponsored by Delta Dental of Tennessee

What esthetic principles are fundamental to generating consistently successful results? How can restorative/ortho interdisciplinary treatments be optimized?

This presentation will address a variety of contemporary topics in the realm of conservative esthetic dentistry. Coordinated approaches to the diagnosis and treatment of interarch tooth size discrepancies as well as appropriate space distribution for cases involving undersized teeth will be discussed with special emphasis on the ortho/restorative interactions that are needed to optimize results. Both the use of directly bonded restorations for tooth shape alteration as well as insights and step-by-step procedures for successful porcelain veneers will be chronicled.

Detailed treatment planning considerations will be elucidated with regards to the management and treatment of missing anterior teeth, including various approaches to providing long-term esthetic provisional restorations. These and many other salient topics will be presented in a manner that highlights interdisciplinary interactions required to optimize clinical success across a broad spectrum of treatment options.

### LEARNING OBJECTIVES

- Identify the various esthetic parameters and artistic principles required for esthetic success and apply them to various conservative esthetic procedures
- Describe the conservative restorative and orthodontic concepts utilized in restorative anterior space closure and the management of inter-arch tooth size discrepancies
- Chronicle the various clinical techniques for the prevention and conservative treatment of white spot lesions
- Relate keys to long-term clinical success for placing and temporizing etched porcelain veneers
- Describe the interdisciplinary treatment planning considerations and treatment options for interim replacement of missing anterior teeth including Carolina bridges

### Harald O. Heymann, DDS, MEd

Dr. Harald Heymann is the Thomas P. Hinman Distinguished Professor of Operative Dentistry at the University of North Carolina School of Dentistry. He is a Fellow in the ICD, ACD, Academy of Dental Materials, and is a Fellow and Past-President of the American Academy of Esthetic Dentistry. Dr. Heymann is Co-Senior Editor of Sturdevant's Art and Science of Operative Dentistry textbook and is a consultant to the ADA. He has authored over 190 scientific publications, given over 1,400 lectures worldwide, is Editor-in-Chief of the Journal of Esthetic and Restorative Dentistry, and has received the Gordon J. Christensen Award for excellence as a CE speaker.

### Gavin Heymann, DDS, MS

Dr. Gavin Heymann earned his DDS and MS in Orthodontics at the University of North Carolina School of Dentistry. He is a fellow of the American and International College of Dentists. His areas of clinical interest include interdisciplinary treatment, use of temporary anchorage devices, and applications of orthodontic dental materials. Dr. Heymann has authored numerous peer-reviewed publications, and is a reviewer for multiple orthodontic and dental journals. He is an adjunct assistant professor in the UNC Department of Orthodontics, and has lectured internationally to orthodontic and dental audiences alike. He maintains private orthodontic practices in Chapel Hill and Durham, NC.

**19 HOURS CE offered. The William F. Slagle Dental Meeting provides nearly half of your biannual CE credits!**

## **Healthy Mouth, Healthy Body, Healthy Practice!**

### **MORNING SESSION**

**8:30 am – 11:30 am**

**Course Code: 008AM / 3 hours CE**

**Sponsored by Premier Dental**

As dental professionals, we are in a unique position to provide our patients with the highest degree of comprehensive care. We need to be knowledgeable about the multifaceted world of systemic health and how it affects our patient's overall health and well-being. It is imperative that we embrace the basic concepts of cariology and periodontal disease progression. These basic constructs coupled with ongoing research and emerging information regarding diet, nutrition and oral health can be practically applied during patient care. Not only will it help us keep our patients healthier, but our practice will benefit as well!

### **LEARNING OBJECTIVES**

- Discuss diet and nutrition as it relates to proper maintenance of oral health and overall health
- Discuss scientific evidence presented in the literature regarding nutrition and oral health
- Relate the importance of diet to dental patients during oral health care appointments
- Identify oral sequelae, which may potentially be related to poor dietary intake
- Manage nutritional issues contributing to oral disease risk by direct patient guidance or appropriate referral to a physician (MD) or a registered dietitian (RD) for dietary consult

### **Lisa Mallonee, MPH, RDH, RD**

Lisa Mallonee is Professor, Graduate Program Director and Registered Dietitian in the Caruth School of Dental Hygiene at Texas A&M University College of Dentistry. She received her Bachelor of Science in Dental Hygiene and a Masters in Public Health with a coordinated degree in nutrition from the University of North Carolina at Chapel Hill. Her passion for educating patients, students, oral health care professionals and dietetic practitioners about the oral health-nutrition link has been the hallmark of her career.

## **Fattening of America: Where Does Dentistry Fit into the Puzzle?**

### **AFTERNOON SESSION**

**1:30 – 4:30 pm**

**Course Code: 008PM / 3 hours CE**

**Sponsored by Premier Dental**

The population is growing... and so are our waist lines! The dental visit isn't "just about the mouth"—it's about the whole patient! The updated food pyramid looks like a plate—how can we relate this information to our patients? Sugar intake, portion control—encouraging healthy habits—what does dentistry have to do with the obesity crisis? Ongoing research and emerging information regarding diet and nutrition as it relates to oral health will be discussed.

### **LEARNING OBJECTIVES**

- Understand the interrelationship between obesity and oral health
- Relate the importance of diet to dental patients during oral health care appointments
- Encourage healthier food choices
- Work with nutrition professionals as multidisciplinary team members in patient management
- Manage nutritional issues either by direct patient guidance or appropriate referral

## CPR Certification and Re-Certification

8:30 – 11:30 am

Course Code: 007 / 3 hours CE

Limited participation course with additional fee of \$50.00.

The CPR certification course presents the American Heart Association health care provider course and provides certification for a period of two years. The course will offer both a lecture and practice on CPR mannequins.

Certification topics to be covered include background information about heart disease, risk factors, prudent heart living, heart-lung function, management of foreign body airway obstruction and adult and pediatric resuscitation. Instruction will include a review of all background material, new material and new methods, as well as supervised mannequin and AED practice and assessment.

This course is also offered on Sunday morning.

Use Course Code: 026

### Lynn Russell, RDH, BSDH, Med, EdD

Lynn is a graduate of the Dental Hygiene class of 1975 and completed her BSDH in 1977. She has over 25 years of private practice experience, and worked both in Community and Preventive Dentistry and the Dental Hygiene Department at the University of Tennessee Health Science Center. She received her M. Ed. from Christian Brothers University and her Ed. D. in Leadership, with a concentration in Adult Education, from the University of Memphis.

Lynn launched the Dental Hygiene program for Concorde Career College, a proprietary school with 16 campuses, and in 2013 became the Director of Teaching and Professional Development for the Concorde group. The program she developed there is now on eight of their campuses. Sharing her expertise, she also wrote a dental hygiene program for a school in East Tennessee.

Currently, Lynn is the Chair of the Department of Dental Hygiene and the Interim Program Director for the Masters of Dental Hygiene program at the University of Tennessee Health Science Center. She is an editor for Gavin Publishing's Journal of Dental Sciences and is active in the Memphis Dental Hygienists' Association and the Tennessee Dental Hygienists' Association having served as Trustee for District 9. Currently, Lynn is the President-Elect and will serve as the President of the TNDHA in 2017-2018.

## Chemical Dependency and Controlled Substance Prescribing

9 – 11:00 am

Course Code: 009 / 2 hours CE

Chemical dependency is a widespread condition that effects men, women and children alike. Effective July 1, 2014, all prescribers in Tennessee who hold a current federal drug enforcement administration (DEA) license, and who prescribe controlled substances are required to complete a minimum of two hours of continuing education related to controlled substance prescribing. This course will provide the required two hours of continuing education for chemical dependency and the proper prescribing of opiates, benzodiazepines and other prescription medications based on the guidelines by the State of Tennessee. The course will also present an overview of substance abuse, addiction, current rehabilitation strategies and the potential impact of substance abuse on the dental practice.

### LEARNING OBJECTIVES

- Describe the scope of the prescription drug abuse problem in the United States and the state of Tennessee

### James C. Ragain, Jr., DDS, MS, PhD, FICD, FACD

Dr. James C. Ragain, Jr., retired from the U.S. Navy in 2013 and subsequently joined the UTHSC College of Dentistry faculty where he teaches biomaterials and operative dentistry. Dr. Ragain is also Director of Continuing Dental Education. He has authored or co-authored over 75 professional publications and holds three U.S. patents. Dr. Ragain has served as a member of the UTHSC College of Dentistry Alumni Board of Trustees for over twelve years. He is a Past President of the University of Tennessee Dental Alumni Association.

- Discuss the key principles dentists should consider prior to considering and initiating opioid therapy
- Describe the modus operandi used by drug-abusing patients
- Discuss the impact of prescription drug abuse on the dental practice
- Describe federal, state, and American Dental Association efforts to reduce the abuse of prescription drug

This course is also offered on Sunday morning.

Use Course Code: 030

**ORANGE 5 - TRAILBLAZERS PROGRAM  
(Recent Grads 2012-2016)****Your Dental Practice: Those First Five Years**

1:30 – 4:30 pm

Course Code: 012 / 3 hours CE

Dentistry and dental education have both changed radically in the last decade— Finding happiness and success today requires a different and ever evolving skill set. However, that doesn't mean every old business model in our field is an antique. Balancing student debt, demands from patients and the challenges of running a successful business can easily feel overwhelming. In this seminar, we'll look at the interesting intersections of fees and case acceptance, staying current and managing overhead, appeasing patient wishes and staying true to your education. Since dentists tend to be gadget freaks, and dentistry is loaded with tools and toys, part of our discussion will focus on understanding the financial differences between them.

Additionally, while attendees in this seminar are focused on the beginning of their careers, we'll spend time considering exit strategy and retirement. More importantly, we'll explore how to make the time between as pleasurable and rewarding as possible. Dentistry is not a 'one size fits all' kind of field. There are lots of different personalities and models for success. Let's work to find the one that fits you best!

**Joseph J. Safirstein, DDS**

Dr. Joe is a 1999 graduate of the UT College of Dentistry and one of nine dentists in his family. He continued his education in Portland, Oregon, earning a certificate in orthodontics in 2001. He currently maintains a private practice in Portland. For the past 10 years, Dr. Joe has taught practice management in the orthodontic residency program at the Oregon Health and Sciences University as an associate professor. He has a special interest in helping young doctors address the pressures faced in transitioning from student life to professional work life, while maintaining happiness and longevity. In addition to private practice and teaching, Dr. Joe regularly consults with dentists and dental professionals in the areas of efficiency, systems and the financials of running a dental practice.

## Grand Slam Restorative Dentistry

MORNING SESSION 8:30 – 11:30 am

Course Code: 017AM / 3 hours CE

AFTERNOON SESSION 1:30 - 4:30 pm

Course Code: 017PM / 3 hours CE

**Sponsored by Dentsply Sirona**

Today's dentists have more opportunities than ever before to successfully practice esthetic dentistry – providing needed dentistry beautifully. Dr. David Bonner has the gift of sorting through the vast array of new materials and techniques to help dentists simplify the complexities of doing excellent restorative dentistry. This presentation empowers dentists and their teams with the use of modern materials and techniques to predictably provide patients with beautiful long lasting restorations. The numerous clinical and business "pearls" presented enhance the ease, joy, and profitability of clinical dentistry, so practicing dentistry is like hitting a "grand slam" every day. This course benefits the entire dental team.

### MORNING SESSION Course Code: 017AM

- Eliminating the problem of post-op sensitivity
- Eliminate the "generation" confusion about bonding agents
- Creating life-like direct anterior restorations
- Creating excellent posterior esthetic restorations
- Great posterior contacts through new and improved matrix systems
- Update on the latest techniques & materials in adhesion dentistry

### David M. Bonner, DDS, MBA, MAGD, FICD, FACD, FICOI

Dr. David M. Bonner received his dental degree from The University of Texas Health Science Center at San Antonio, Dental School in 1980. He earned his MBA in Health Care Management from Texas Tech University. Dr. Bonner's private practice is focused on esthetic dentistry and he is an adjunct clinical professor at the UTHSCSA School of Dentistry. He is an accomplished dentist, professor, author, researcher, and professional speaker, who is passionate about dentistry.

Dr. Bonner has served as President of the Panhandle District Dental Society and as a Vice-President for the Texas Academy of General Dentistry.

### AFTERNOON SESSION Course Code: 017PM

- Anterior porcelain restorations "simplified" from smile design, preparation, beautiful temporization, ease in bonding, rapid clean-up
- Principles of full-mouth reconstruction
- Clinical pearls that enhance the ease & predictability of practice
- Business systems that immediately enhance clinical practice & profitability
- How an MBA approaches dental fees
- Immediately enhance the profitability and pleasure of practicing dentistry

## Thank you to our Exhibitors!

- Friday Raffles for large prizes at 1:15 PM. Must be present to win.

## Newest Techniques for Implants and Dentures

8:30 am – 11:30 am

Course Code: 018AM / 3 hours CE

Sponsored by Dentsply Sirona

This course will cover enhanced impression procedure for making of the partially edentulous, the immediate denture, full denture, implant retained overdenture patient. These innovations in impression making will take you to the next level for those patients who need any type of removable and/or implant prosthodontic restoration. Utilize a new method to allow patients to visualize the final esthetic smile prior to beginning the procedure.

### LEARNING OBJECTIVES

- Impression making for the dentate, immediate, implant retained overdenture patient to the total/partial edentulous patient
- Make an accurate center bearing point tracing record for the full mouth restorative patient in 5 minutes
- Differentiate between indications for bar, stud, and fixed implant attachments

### Joseph Massad, DDS

Dr. Massad is in private practice in Tulsa, Oklahoma, a Fellow of both the American and the International College of Dentists, a Regent/Fellow of the International Academy for Dental Facial Esthetics, and is an honorary member of the American College of Prosthodontics. Currently, he holds faculty positions at Tufts University School of Dental Medicine in Boston, Department of Comprehensive Dentistry at the University of Texas Health Science Center Dental School in San Antonio, Adjunct Associate Professor, Department of Restorative Dentistry, Loma Linda University, and Associate Professor in the Department of Prosthodontics, the University of Tennessee Health Science Center, College of Dentistry.

## DENTAL HYGIENE UPDATE

### The Changing Face of Dental Hygiene

9:00 am – 4:30 pm

Course Code: 019 / 6 hours CE

Sponsored by Premier Dental

As we witness a changing trend in healthcare delivery in our country, it is evident that the dental hygienist plays an integral role in their patient's overall health. The hygienist stands on the front line in advocating prevention, esthetics and therapeutic advances.

This program will highlight the potential skills necessary to adapt to that changing model as we explore alternative approaches to treatment settings, changing demographics and advancing technologies.

Participants in this course will recognize the need for skills in patient motivation, risk assessment, advanced instrumentation and implementing these skills in the dynamics of their practice setting.

#### LEARNING OBJECTIVES

- Brainstorm alternative paths to utilize the future dental hygienist
- Compare and implement a workable risk assessment for their patients

#### Lillian Caperila, RDH, BSDH, MEd

Lillian Caperila is a licensed, dental hygienist and her professional career has spanned 40 years to include assisting, clinical hygiene, educator and currently a professional educator. She has provided well over 450 seminars in the United States and internationally.

With a degree in instructional design and training, from Penn State University, Lil has developed an effective style in bringing her dental hygiene experience to life with her audience.

Lil is the 2010 award recipient of the ADHA Irene Newman Award in Professional Achievement and has recently been published as a contributing author to the textbook, *Dental Hygiene: Applications to Clinical Practice*.

- Explore the need for diagnostic technologies and best practice screening systems
- Apply skillful tips in guiding patients to healthier lifestyle and behavior changes
- Develop greater confidence in the selection of advanced instrument designs
- Choose effective treatment modalities when faced with symptoms of oral diseases
- Demonstrate effective supervision skills in patient's desire for teeth whitening

## ROCK Your Practice to the Top!

8:30 am – 4:30 pm

Course Code: 020 / 6 hours CE

Sponsored by DIL Dental Lab

This fun, fast-paced course is perfect for all doctors, team members and spouses who want to easily and predictably take their practice to a level they never thought possible! It's filled with incredibly usable content, and also features videos, music and humor to make it unlike any other dental seminar most have ever experienced. The Madow Brothers make sure that every single dentist and team member in the audience learns the secrets of delivering better patient care, practice growth, and fulfillment in the profession of dentistry while having an enjoyable day. Practically every attendee reports that a Madow Brothers seminar was the best day they have ever spent in dentistry.

### LEARNING OBJECTIVES

- Every dentist and team member will gain the knowledge to increase productivity while enjoying their profession more than ever before
- Practices will learn how to increase new patient numbers significantly and serve their current patients better through increased treatment plan acceptance and better treatment options
- Dental teams will become educated with better communication skills; more able to function as a true team and love their career

### The Madow Brothers

In 1989, The Madow Brothers were founded to help fellow dentists achieve success and happiness in their practices. Their e-letters, Audio Series, and "PostcardBOOM" programs are known throughout dentistry.

The Madow Brothers are known for their seminars: How to Love Dentistry, Have Fun and Prosper, ROCK Your Practice to the Top, and TBSE – an annual event, which thousands of dental professionals have dubbed "The Best Seminar Ever."

Their hilarious, spontaneous style and content packed programs have taught thousands of dental professionals how to enjoy their careers, super charge their practices, create their own personal success, and have more fun than ever.

## New This Year: Meeting Quick Reference Guide

Review conference details, venue information, maps, directions, course info, speaker bios and more!

## HANDS-ON PARTICIPATION COURSE

### Successful Management of Patients with Anxiety or Special Needs

8:30 am – 4:30 pm

Course Code: 021 / 6 hours CE

In this active participation workshop, all attendees will have the opportunity to experience many tools and techniques used in the dental office, O.R. or offsite to manage patients who have anxiety or special needs. Participants will role play the practitioner and the patient with equipment such as body wraps, mouth props, intra-oral lighting systems, head lights, and more. They will learn techniques for mouth opening, head immobilization, throat packing, proper nitrous oxide mask placement, and processing self-developing dental film. Participants will manipulate handheld x-rays and portable imaging systems, and evaluate drug interactions on the computer.

#### LEARNING OBJECTIVES

- Feel more comfortable treating anxious and special-needs patients in a dental office, operating room, or offsite facility
- Use tools and equipment specifically developed to treat difficult or otherwise unmanageable patients
- Expand your practice to include patients you may not currently be seeing

#### Harvey Levy, DMD, MAGD

Harvey Levy practices in Frederick, Maryland, emphasizing comprehensive care for individuals with special needs. He is a graduate from Tufts 1974 and Eastman GPR 1976, and taught at The University of Pennsylvania and University of Maryland. Dr. Levy earned Mastership and five Lifelong Learning Service Recognitions by the Academy of General Dentistry, plus eight fellowships, five diplomate certificates, and board certification in Integrative Medicine. His work with anxious patients earned him the AGD Humanitarian Award, Maryland Governor's Doctor of the Year Award, Maryland's Arthur Friedley Humanitarian Award, Special Care Dentistry's Saul Kamen Award, Morgan State Public Health Award and ADA Access to Care Award. Dr. Levy holds nine black belts, and is a USA Martial Arts Hall of Fame inductee.

**Remember to check the website & download your speakers' handouts! They will be uploaded as we receive them.**

## Shhhh...What We Do Need to Talk About

8:30 – 11:30 am

Course Code: 016 / 3 hours CE

Registered spouses use Course Code: 016SP

This seminar promises to be an “eye opener.” An extremely timely course brings to the forefront the myriad of decisions to make or decide not to make for the secession of your life’s work—your dental practice. As Brenda Thaxton’s biographical sketch explains, she is the surviving spouse of Steven Thaxton, DDS. In Tennessee, a surviving spouse has two years as a non-dentist to own a dental practice and transition it. However, the value of the practice can decline rapidly losing both employees and patients while a spouse is in incapacitating mourning. Suddenly, a spouse owns a dental practice and all the federal, state, and local regulations still apply and the spouse is liable. All the taxes, payroll, HIPPA, OSHA, insurances, and emergency patient considerations, to name a few, must continue. It is a great act of love to preemptively set up the systems necessary. This compassionate and informative seminar will discuss what happens if there is an unexpected death.

### Brenda P. Thaxton, RDH, BS

Brenda Thaxton is the surviving widow of Steven F. Thaxton, DDS, MAGD, who died suddenly in an accident in 2013. They were married for 39 years. Immediately thrust into the ownership of a dental practice, she provided care for her husband's patients and successfully transitioned it. 95% of the patients and 100% of the employees transitioned with the practice and Brenda received her asking price within five months.

Brenda received her BS degree in dental hygiene from the University of Tennessee in 1975 and pursued post graduate studies at Cumberland University. She worked as a dental hygienist, office manager and corporate officer for 40 years. Since Steven's death, Brenda has devoted her time to helping others, who could potentially find themselves in the same situation. She has lived it. Brenda presents her survival story at numerous dental meetings throughout the mid-south.

### LEARNING OBJECTIVES

- Develop an organized system for transitioning a dental practice
- Coping skills during the transition
- Life at home and all that stuff

## OSHA & Infection Control: Time is Our Enemy

1:30 – 4:30 pm

Course Code: 025 / 3 hours CE

Recommended for the Entire Staff

In March of 2016, the Centers for Disease Control and Prevention (CDC) published Summary of Infection Prevention Practices in Dental Settings: Basic Expectations for Safe Care based upon the recommendations of existing evidence-based guidelines from 2003. The original recommendations and the summary are meant to help dental health care workers (DHCW) achieve compliance. Time, however seems to be the enemy. This course will look at ways to address time constraints and basic infection control principles. Dental water asepsis, instrument processing and cleaning and disinfecting will be reviewed along with OSHA's Hazard Communication.

### Catherine Warren, RDS, MEd

Katy Warren is a registered dental hygienist and an Associate Professor in the Department of Dental Hygiene, College of Health professions at the University of Arkansas for Medical Sciences. She has been active in teaching clinical dental hygiene for over 30 years. Katy is the president of an infection control compliance company and has presented numerous continuing education courses on infection control. She serves as an infection control evaluator for the Arkansas State Board of Dental Examiners. Katy is a member of the American Dental Hygienists' Association and the Organization for Safety, Asepsis and Prevention (OSAP).

### LEARNING OBJECTIVES

- Identify items that DHCW tend to avoid due to time constraints
- Discuss the basic principles of infection control
- Identify sources to help DHCW be in compliance
- Review OSHA's Hazard Communication Standard

This course is also offered on Sunday morning.  
Use Course Code: 027

## Managing Risk Factors in Implant Dentistry

8:30 – 11:30 am

Course Code: 028 / 3 hours CE

Dr. Green has over twenty years of experience as a legal expert in California. He has been involved in over 300 cases defending Periodontists, Prosthodontists, General Dentists and accident victims. Dr. Green will explain some of the pitfalls in implant dentistry and how to avoid getting into hot water. The participant will learn how to properly document and manage patients with anatomical and restorative difficulties. A variety of actual cases will be discussed.

### LEARNING OBJECTIVES

- What is the standard of care and informed consent mean in legal terms?
- How to recognize the problems in implant dentistry and how to implement the solutions
- Informing patients about the alternative options to implants
- Actual cases in which Dr. Green has been an expert, what happened and how the cases were resolved

### Martyn Green, DDS, MS

Dr. Martyn Green is a graduate of UCLA, USC Dental School, Boston University Periodontal program and has his Master of science in Health Professions Education from Loma Linda University. He is a Diplomate of the American Board of Periodontology and is currently the Director of Advanced Education in periodontics at Tufts University School of Dental Medicine. Dr. Green has lectured nationally and internationally on Periodontology and Implant Dentistry and previously practiced full-time in Beverly Hills, CA.

## Guidelines for Diagnosis, Treatment and Management of Patients with Eating Disorders

8:30 – 11:30 am

Course Code: 029 / 3 hours CE

According to the National Eating Disorders Association, 20 million women and 10 million men in the United States suffer from eating disorders sometime in their life time. Children as young as 12 and 13 are affected by this disorder. Unfortunately, since eating disorders are a mental health condition and carry a negative social stigma many patients affected by this disease are reluctant to disclose their condition to medical and dental professionals.

Learn about the clinical, oral and psychological characteristics of Eating Disorders and the latest preventive guidelines for treating this patient population. Guidelines for early detection and multidisciplinary approach can allow dentists to identify signs of eating disorders and help patients to recovery.

### Mojdeh Dehghan, DDS

Dr. Mojdeh Dehghan is a graduate of Baylor College of Dentistry with over 25 years of private practice, and university faculty practice experience. Currently, she is an Associate Professor and Associate Director of the Division of Esthetics at the University of Tennessee College of Dentistry. Dr. Dehghan is the past president of the College Faculty Organization. Her research in Dental Erosion has won several awards including the 2014 AAWD Proctor and Gamble/Gillette Hayden Memorial Foundation Research Award. She has published in several scientific Journals including General Dentistry, Journal of Cosmetic Dentistry, Journal of Dental Education, Journal of Dental Research and Inside Dentistry. Her professional memberships include the OKU Honor Dental Society, the ADA, TDA, ADEA, IADR, AAWD and AADR.

### Nancy Johnson, EDD, LPC/MHSP

Dr. Nancy Johnson is Clinical Director for Eating Disorders and Grief and Trauma Intensive Outpatient Programs at Transformation Center, Cordova, Tennessee. She has a doctoral degree in Counseling and Education and a Master's degree in Community Agency Counseling from The University of Memphis. Dr. Johnson's Bachelor of Science degree in Psychology with minor in Women's Studies is from the University of Northern Colorado.

Dr. Johnson has been a licensed professional counselor for ten years with over 25 years of experience working in mental health settings. She was given the West Tennessee Counseling Association's Private Sector Counselor of the Year Award in 2008. Dr. Johnson works with a variety of counseling issues that include: addictions, eating disorders, depression, anxiety, grief and loss, and crisis management.

"Throughout my career, I have been a strong advocate especially for women and children." Dr. Johnson is a member of the Tennessee Counseling Association (TCA) and past president of the TCA division of Tennessee Mental Health Counseling Association.

# OUTSTANDING ALUMNUS

## Dewayne McCamish, DDS, MS

Were it not for an active sports life, Dr. Dewayne McCamish may have chosen a different career. Interactions with three people in particular—all dentists—during high school and college encouraged Dr. Dewayne McCamish to study dentistry, specializing in orthodontics.

The University of Tennessee Health Science Center (UTHSC)

College of Dentistry (COD) Alumni Association has named Dr. Dewayne McCamish an Outstanding Alumnus Award recipient for 2017.

Dr. McCamish enrolled in the UTHSC COD following his 1967 graduation from Middle Tennessee State University (MTSU) and earned a DDS in 1970. He received a master's degree in orthodontics from the UTHSC Graduate Orthodontics program in 1973.

In March 2016, Dr. McCamish was installed as the 109th president of the American Association of Orthodontics (AAO). He has also served as past president of the Southern Association of Orthodontics (SAO), the Tennessee Association of Orthodontists (TAO), the University of Tennessee Orthodontic Alumni Association, and the Third District Dental Society (now named the Chattanooga Area Dental Society). He has been inducted as a Diplomate of the American Board of Orthodontics, a member of the College of Diplomates of the American Board of Orthodontics, and is a Fellow of both the American College of Dentists and the International College of Dentists.

Dr. McCamish has been recognized for his professional service with the Oren Oliver Distinguished Service Award from the SAO and the Outstanding Alumnus Award by the UTHSC Graduate Orthodontic Program.

Dr. McCamish is very proud of the patients he has treated in 44 years of practice, and has four keys to success: strive for excellence in all you do, keep your life in balance, establish relationships with your patients, and always honor your code of ethics.

Dr. McCamish continues the active sports life that led him to dentistry. He is an avid tennis player, golfer, snow skier and yoga enthusiast.

## Carl Sebelius, DDS

In recognition of his contributions to his alma mater and the dental profession, Dr. Carl Sebelius has been named a UTHSC COD Alumni Association Outstanding Alumnus Award winner for 2017.

Dr. Sebelius was inspired to attend dental school by his father and grandfather, who were also dentists. He is a 1964 University

of Tennessee Health Science Center (UTHSC) College of Dentistry (COD) graduate and completed a residency in oral and maxillofacial surgery at UTHSC in 1967.

In 1968, Dr. Sebelius joined the faculty in the COD. He served on 18 COD committees during his 41-years as a faculty member including the COD Faculty Senate, the Administrative Council, and was chairman of the Committee of Faculty. He retired in 2009 as Professor Emeritus.

Dr. Sebelius maintained a private dental practice while still a full-time member of the COD faculty. He served on the staff of Baptist Memorial Hospital as chairman of the Department of Dentistry and was courtesy staff with LeBonheur Children's Medical Center and Methodist Healthcare until his retirement.

Dr. Sebelius has been elected president of virtually every organization of which he is a member, including the Memphis Society of Oral and Maxillofacial Surgeons, the Memphis Dental Society, the Tennessee Dental Association, Omicron Kappa Upsilon Psi Chapter of Xi Psi Phi Fraternity, and the American Dental Interfraternity Council. He served as a Regent for the American College of Dentists in leadership positions for the American Dental Association, the Tennessee Board of Dentistry and the Regional Medical Center at Memphis (now Regional One).

Dr. Sebelius received numerous awards throughout his career. He was awarded the Distinguished Service Award from the UT Alumni Association in 1998 and has additionally received awards from the International College of Dentistry, the Tennessee Dental Association, the American College of Dentists, Who's Who in Dentistry, Xi Psi Phi Fraternity, the International College of Dentists, and the Memphis Dental Society.

Complete bios of Dr. McCamish and Dr. Sebelius can be found on the Dentistry Alumni Weekend website:  
[www.uthscalumni.com/DentistryWeekend2017](http://www.uthscalumni.com/DentistryWeekend2017)

## RECENT ALUMNUS AWARD

**Cory Glenn, DDS**

Dr. Cory Glenn's trajectory to success since his 2008 graduation from the University of Tennessee Health Science Center (UTHSC) College of Dentistry (COD) is described as unprecedented by his classmates and colleagues. In the online dental community, Dentaltown, Dr. Glenn's posts are among the most followed by its virtual inhabitants. Dr. Glenn considers himself a small-town dentist who loves to learn.

Dr. Glenn is the 2017 recipient of the UTHSC COD Alumni Association's Recent Alumnus Award.

Dr. Glenn completed a one-year residency program in Advanced Education in General Dentistry with a focus on comprehensive care and dental implants through UTHSC. Immediately following, he purchased an established practice in Winchester, Tennessee, and has found it much easier to grow a practice in a small town rather than in a larger city.

In his practice, Dr. Glenn focuses on utilizing technology and innovative techniques to provide treatment in an efficient and cost-effective manner. His colleagues consider him a "MacGyver" of dentistry due to his innovation.

Dr. Glenn is a graduate of the Georgia Maxi Course in Implant Dentistry, the American Orthodontic Society's Comprehensive Ortho Program and is credentialed as an Associate Fellow of the American Academy of Implant Dentistry. He considers himself a perpetual student, and in 2012 exceeded the required 20 hours of continuing education by taking more than 380 hours.

Dr. Glenn is the continuing education director for the Middle Tennessee Dental Study Club and vice president of the Southern Tennessee Christian Medical and Dental Association. His professional and communal affiliations include membership in the American Dental Association, the Academy of General Dentistry, the American Academy of Cosmetic Dentistry, Rotary International, Gideons International, and the Franklin County Chamber of Commerce.

Complete bios of Dr. Glenn and Dr. Alfonso can be found on the Dentistry Alumni Weekend website:  
[www.uthscalumni.com/DentistryWeekend2017](http://www.uthscalumni.com/DentistryWeekend2017)

## DISTINGUISHED SERVICE AWARD

**William Alfonso, DDS**

The University of Tennessee College of Dentistry Alumni Association has selected Dr. William Alfonso as the 2017 recipient of the Distinguished Service Award. This new award is presented to Dr. Alfonso in recognition of his pro bono contributions to the dental profession.

William Alfonso, DDS '77, has lived both his personal and professional life with service to others as his primary motivation and is the founder of Operation New Life, a multi-disciplinary surgical mission group.

Dr. Alfonso felt called to serve God by using his skills to help those without proper access to dental care. In 1998 he sold his private oral and maxillofacial surgery practice and for five years traveled with his wife, Sandra, on one-week trips to Honduras several times per year performing medical and non-medical missionary work.

In 2004, Dr. Alfonso met Little Rock plastic surgeon Dr. Kris Shewmake and formed Operation New Life. The pair traveled to Honduras and Hospital Escuala, the only hospital to serve the indigent population in a country with a poor diet resulting higher-than-normal incidence of malformed skulls and faces.

In the past 11 years, Dr. Alfonso has made the one-week trip between three and eight times per year, leading a team of surgeons, nurses, and non-medical missionary workers. He and other doctors with Operation New Life recently completed training of two oral and maxillofacial surgeons to continue the missionary work as full-time staff with Hospital Escuala. Dr. Alfonso feels the treatment program in Hospital Escuala is in excellent hands.

Dr. Alfonso believes he has completed his work in Honduras but is not leaving missionary work altogether. He and Sandra plan to continue serving in the Dominican Republic. They will still travel just one week at a time — working where needed — whether it is humanitarian, medical or evangelistic.
