

WILLIAM F. SLAGLE DENTAL MEETING

EST 1995

Formerly Midsouth Dental Congress

March 4 - 6, 2016 • Hilton Memphis

PRESENTED BY
THE UNIVERSITY OF TENNESSEE HEALTH SCIENCE CENTER
COLLEGE OF DENTISTRY

THE UNIVERSITY OF TENNESSEE

UT ALUMNI
HEALTH SCIENCE CENTER

Welcome to the 2016 William F. Slagle Dental Meeting

The William F. Slagle Dental Meeting, formerly named the MidSouth Dental Congress, is one of the College of Dentistry's greatest traditions. The inaugural meeting was held in 1995 to promote quality care by providing the dental team with an exceptional education opportunity. Continuing this mission, the Slagle Dental Meeting is committed to offering extensive continuing education courses, commercial exhibits, and additional educational programs advancing the growth and development of the dental profession.

The Planning Committee, the Dentistry Alumni Association, and the UT College of Dentistry have worked diligently to present a 2016 program that honors the meeting's legacy with the highest caliber continuing education speakers. The program also includes hands-on courses and expanded programming for the entire dental office staff.

Throughout its history, the meeting has provided more than \$2 million in proceeds directly to the College of Dentistry – a benefit you do not get from other continuing education programs. Your participation at the Slagle Dental Meeting and Dentistry Alumni Weekend helps enhance the dental school experience for current and future students.

On behalf of the University of Tennessee Health Science Center College of Dentistry Alumni Association and the planning committee, I extend our warmest greetings to you and thank you for your participation in this exciting event.

We look forward to seeing you in Memphis!

Warmest Regards,

Paul McCord, DDS '78

President, Dentistry Alumni Association Board of Trustees

Mission Statement

The mission of the William F. Slagle Dental Meeting is to advance the delivery of quality dental care by providing the dental team with a premier educational opportunity. In accordance with this mission, the William F. Slagle Dental Meeting is committed to offering extensive continuing education courses, commercial exhibits, and additional educational programs advancing the growth and development of the dental profession.

The William F. Slagle Dental Meeting is sponsored by the University of Tennessee Health Science Center, College of Dentistry Alumni Association. All profits from the William F. Slagle Dental Meeting are used to support dental education programs at the University of Tennessee. Thank you for your support!

Buses leave the Hilton at 4:45 pm and return at 8:45 pm*

General Information

Registration

Please return your registration form with remittance by February 23, 2016. We encourage you to register early and take advantage of the discounted fee for registration by February 15, 2016. Advance registration for all programs is strongly encouraged and appreciated. Check-in for the William F. Slagle Dental Meeting begins Thursday afternoon at the Hilton Hotel and will continue all day Friday, Saturday and Sunday mornings. All information, name tags, and meal tickets will be held for pick-up at the registration desk. Your registration fee covers your choice of sessions unless otherwise noted, Friday and Saturday lunch, refreshment breaks, continuing education credit, and admission to the Welcome Party and exhibit booths.

Payment/Cancellation Policy

Please make checks payable to the UT/William F. Slagle Dental Meeting. Mail or fax with your registration form to:

William F. Slagle Dental Meeting
UT Department of Conferences
P.O. Box 2648
Knoxville, TN 37901
Voice: (865) 974-0250 • Fax: (865) 974-0264

Go to www.slagledentalmeeting.com to register online. *We call your attention to our cancellation policy.*

In order to ensure adequate arrangements for courses, food, and other events, no refunds will be given after February 26, 2016. Please submit a written request by email to UT Conferences (conferences@UTK.edu). A \$30 processing fee will be charged for each cancellation processed. Refund checks will be mailed within three weeks of adjournment of the William F. Slagle Dental Meeting. For more details, call toll-free (877) 216-0009.

Hotel Accommodations & Services

Please make your hotel reservations by phoning the Hilton Memphis at (901) 684-6664 or toll free at (800) 445-8667. You must identify yourself as a participant of the William F. Slagle Dental Meeting to receive the special rate of \$129 single/double. All room reservations must be made by February 1, 2016. Hotel confirmation will be sent from the Hilton Memphis. The hotel provides free shuttle service from the Memphis International Airport. **Please note:** The William F. Slagle Dental Meeting has been designated a non-smoking conference. A smoking area is provided at the Lakeside exit of the conference venue.

Location

The Hilton is conveniently located off Interstate 240 and Poplar Avenue in one of Memphis' most upscale and residential areas. It is 20 minutes from the Memphis International Airport.

939 Ridge Lake Blvd.
Memphis, TN 38120
(901) 684-6664 or (800) 445-8667

Continuing Education Credit

The formal continuing education programs of The University of Tennessee Health Science Center College of Dentistry are accepted by AGD for Fellowship/Mastership credit. The current term of acceptance extends from 11/01/2015 through 12/31/2019. Provider ID# 146050

The University of Tennessee Health Science Center College of Dentistry is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. The current term of approval extends from November 2015 to December 2019.

Courses presented are acceptable by those states that recognize the ADA (CERP) approved and AGD accepted providers.

Upon completion of the course each participant will receive a certificate of completion, which includes the name, date of the course, and the credit earned.

Continuing education courses that are presented cover all aspects of the practice of Dentistry including new knowledge that may not be widely accepted by the profession. In so doing, some presentations may include controversial material or commercial reference. Please be aware that the presentation of such course material should not be considered as an endorsement or approval of a particular philosophy, product, or procedure.

The University of Tennessee Health Science Center College of Dentistry designates this activity for a total of 18 continuing education credits. A total of 18 credit hours may be earned by attending the maximum number of courses, (15 hours), mini-sessions, (2 hours), and breakfast with faculty, (1 hour).

General Information

Accommodations for Disabilities or Dietary Requirements

If you require special accommodations for a disability or have dietary restrictions, please notify the UTHSC College of Dentistry no later than February 20, 2016. Call (877) 216-0009.

Exhibit Hall

The exhibit hall will be open Friday from 7:30 am to 5:00 pm, and Saturday from 7:30 am to 2:00 pm. The new design features coffee break stations inside the hall, CE information desk and raffle drawings for an impressive array of prizes at 1:15 pm daily. The exhibit hall has become an important

part of our annual event. Please support our exhibitors by placing orders for your office while at the William F. Slagle Dental Meeting.

UT Dental Student Sponsorship

Sponsor a current UT College of Dentistry student to attend this year's William F. Slagle Dental Meeting. Your \$75 sponsorship will allow a student the opportunity to participate in the courses and network with dental professionals. Simply indicate the number of students you would like to sponsor on the registration page and include that amount in your registration fee. Your support is greatly appreciated.

Alumni Events

Friday, March 4, 12 pm–1:15 pm

UT Alumni Awards Luncheon

Make plans to join your classmates and fellow UT grads as we honor the 2016 Outstanding Alumnus, Justin D. Towner III, DDS '54 and Phillip A. Wenk, DDS '77. Back by popular demand, the Q&A session with University of Tennessee System President Joe DiPietro, Chancellor Steve Schwab and Dean Timothy Hottel will also be a part of this event.

Special seating has been arranged for UT Alumni to attend this Awards and Reunion Luncheon and is included in your registration fee. Additional lunch tickets may be purchased for guests at \$30 each. Please purchase these tickets in advance. Refer to the registration form for details.

Please note: The Friday Awards Luncheon for UT Alumni and their guests will be held in the Ballroom. (Lunch for non-alumni will be served in rooms on Director's Row)

Call (877) 216-0009 for more details.

Saturday, March 5, 7:00 pm

UT Class Reunion Dinners

Coordinated by Individual Classes and UT Alumni Office

How many of your classmates have you seen since you graduated? This is the perfect time to renew acquaintances.

The classes of 1976, 1986, 1991, 1996 and 2006 will be celebrating reunions. To find out if your class is planning a special activity, check out the Dentistry Alumni Weekend website at:

www.uthscalumni.com/DentistryWeekend2016

or phone the UT Alumni Office at (901) 448-5516 or (800) 733-0482, or email Kristin Attaway at kattaway@utfi.org. **Dentistry Alumni Weekend registration opens on Friday, December 4.**

Saturday, March 5, 5 pm—7 pm

Class Social Cocktail Reception

Join your fellow College of Dentistry alumni 33 floors above the beautiful scenery of East Memphis for the first-ever class reunion cocktail reception in the Tower Center. This event is the perfect for meeting up with your classmates before your reunion dinner on Saturday evening.

Heavy hors d'oeuvres and cocktails will be served at this special celebration. The Tower Center is located in Clark Tower, 5100 Poplar Avenue, Memphis, TN 38137.

The cost is \$15 per person.

Lasers in Dentistry: A Two-Day Comprehensive Primer

8:30 am – 4:30 pm

Course Code: 001 / 12 hours CE

The use of hard tissue and soft tissue lasers in dental practice continues to evolve and improve. What began as a simple excisional device has transformed into a technology, which can be used in every dental specialty. This informative and interactive, hands-on experience will take you into the world of laser dentistry beyond gingivectomy and fibroma removal.

Presentation and hands-on, (pig jaws and extracted teeth), topics will include cavity preparation, techniques to enhance periodontal surgery, and predictable pain relief using various wavelengths. In addition, there will be special emphasis on when and how to utilize lasers in dental hygiene with an eye on the Dental Practice Acts of Tennessee, Arkansas and Mississippi.

LEARNING OBJECTIVES

- Understand that not all lasers are created equal; different wavelengths produce different results
- Learn why a single laser wavelength is not appropriate for every dental indication
- See real time video and photographs of clinically relevant laser procedures across multiple specialties
- Spend time performing hands-on exercises on pig jaws and extracted human teeth
- Get a sneak peek at how lasers are being incorporated into dental education at the University of Tennessee College of Dentistry

Les H. Binkley, DDS

Dr. Les Binkley is a practicing periodontist in Memphis, Tennessee. He graduated from the University of Tennessee College Of Dentistry in 1974 and completed a residency in Periodontics and a Master of Science in 1978 from Ohio State University. Dr. Binkley has been a part-time faculty member in the Department of Periodontics at the College of Dentistry since returning to Memphis in 1978 and has published seven peer review articles.

Dr. Binkley has been using lasers in periodontics for over ten years including; the Erbium, Nd:YAG, CO₂, and diodes laser. He lectures at national and international laser meetings instructing in the use of lasers in periodontal therapy. He also shares his four year research project comparing lasers and conventional periodontal therapy.

(No disclosures)

Paul N. Gregory, DDS, MHA

Dr. Gregory earned his B.S. from the University of Kansas and his M.H.A. from the University of Memphis. He is a graduate of UMKC College of Dentistry. He served in the US Air Force for two years and then entered private practice for the next twenty years. Dr. Gregory joined the UT Dental College faculty in 1993 and is currently serving as a member of the Department of General Practice Dentistry. He has been active in teaching laser dentistry to faculty and students. He is currently co-author of several research papers, which involve dental laser treatment.

(No disclosures)

Christopher J. Walinski, DDS

Dr. Christopher J. Walinski has been an author, inventor and innovator in Laser Dentistry for almost two decades. His 2003 text on laser dentistry has been published in over ten languages. He was a founder of, and is the Executive Director of the World Clinical Laser Institute, from which he has received Mastership certification, and has Laser Certifications through the Academy of Laser Dentistry. He is Associate Professor and Director of Laser Dentistry at The University of Tennessee College of Dentistry and is a Visiting Professor at Harvard University and Taipei Medical University College of Oral Medicine, emphasizing dentistry using lasers and other technologies.

(No disclosures)

Remember to check the website & download your speakers' handouts! They will be uploaded as we receive them.

The Savage Bottom Line

8:30 am – 11:30 am

Course Code: 002AM / 3 hours CE

The world will never be as it was in the past. Dental practices need to be more focused on the bottom line: overhead control, delegation and accountability. Alice in Wonderland says, “If you don’t know where you’re going, any old road will get you there.” Is your overhead climbing year after year? Are your fees too low? Is a transition in your future? We know that by ‘tweaking’ systems, increasing communication and elevating teamwork, you’ll get results, not just theories. This fun, fast paced, high content course will give you tools to implement quickly.

LEARNING OBJECTIVES

- Understand the “BAM”
- Consider various bonus programs
- Compare their overhead numbers to national statistics, including staff salaries, benefits, supplies and laboratory costs
- Look at production and collection statistics
- Implement ‘Up Front’ accountability: How to get ordinary people to believe and do more.

The “Savage” Front Desk: A Team Approach

1:30 pm – 4:30 pm

Course Code: 002PM / 3 hours CE

Some dental practices thrive with limited stress. Others struggle with managing their budget, overhead, and overall systems. What they need is...a unique success driven team approach!

In order to ensure a healthy bottom line, systems are key! Dr. Savage will guide you and the Front Office through the ins and outs of what it takes to implement a fool proof “Savage” front desk. These systems are the key to the top-tier practices and their success! Enjoy a lively session while learning where to grow and streamline the business, you can do it and we will show you how!

Rhonda R. Savage, DDS, CSP

Dr. Rhonda Savage is an internationally known author and lecturer. She is owner of Uptown Dental, a principle owner of Savage Dental Marketing, and CEO of Miles Global, an international dental training and consulting firm. She lectures and publishes on women's health issues, leadership, and business management.

Her credentials are strong. Dr. Savage is a Past President of the Washington State Dental Society, and an Affiliate Faculty Member of the University of Washington School of Dentistry. She is also a member of the Pierre Fauchard Academy, American College of Dentists, and the International College of Dentists.

Her history in the dental practice world is multifaceted. A former dental assistant and front office staff member for 14 years, she understands the dynamics of success in a dental team.

Her understanding of leadership is deep. A dentist in private practice for over 18 years, she knows the demands of quality patient care, leading a winning team and running a successful business.

Dr. Savage brings a unique energy to her work. A Lieutenant Commander in the Navy during the years of Desert Shield and Desert Storm, she received the Navy Achievement Medal and an Expert Pistol Medal, earning her the nickname of “The Beast.” She’s a “straight shooter” aiming at the critical issues that dental practices face today.

(Delta Dental of Tennessee – Honorarium; Miles Global, Savage Dental Marketing, Philips – Financial or Material Support)

LEARNING OBJECTIVES

- The patient’s experience
 - The new patient & the new patient interviewing you!
 - The existing patient with extensive needs
- Hygiene department effectiveness
- Overview of front desk systems
- Patient reactivation
- Clearly defined financial policies

Adapting Your Mind to Orthodontic Treatment

MORNING SESSION

8:30 am – 11:30 am

Course Code: 003AM / 3 hours CE

Successfully Treating the Limited Orthodontics Case.

This course is designed to provide dentists with an Advanced knowledge in orthodontic diagnosis and treatment planning, and guidelines for placing brackets and treatment of orthodontic cases that are considered “limited” in nature, requiring minimal orthodontic intervention. Additionally, the benefits of including orthodontic treatment as a part of an interdisciplinary team approach to treat select clinical scenarios will be demonstrated. Using orthodontics to idealize restoration space and for ridge development in preparation for an implant restoration will be discussed.

LEARNING OBJECTIVES

- Collect and analyze orthodontic diagnostic records
- Diagnose and differentiate between limited and complex cases
- Develop an appropriate treatment plan and fully treat “limited” orthodontic cases
- Identify clinical scenarios that will benefit from the inclusion of orthodontic treatment.

AFTERNOON SESSION

1:30 pm – 4:30 pm

Course Code: 003PM /3 hours CE

Is My Child Ready for Braces? A discussion on orthodontic problems that are frequently encountered during the mixed dentition stage of dental development. If untreated, these problems can contribute to dental malocclusion. Examples of orthodontic appliances used for space maintainers, harmful habits, cross-bites and growth problems will be covered, as well as records used for diagnosis and treatment planning.

Unconventional Orthodontics in Conventional Practice, Not Your Grandfather’s Braces. General practitioners frequently encounter patients undergoing orthodontic treatment, which does not meet their normal expectation of

Terry M. Trojan, DDS, MS

After 30 years of specialty practice, and four years of retirement, Dr. Trojan joined the faculty at UTHSC in 2009 and has held the positions of Graduate Clinic Director and Graduate Program Director in the Department of Orthodontics. He is currently Chair of the Department of Orthodontics. Dr. Trojan received his D.D.S. degree and his M.S. and Certificate in Orthodontics from the University of Michigan. He is a diplomat of the American Board of Orthodontics, a fellow of both the American and the International College of Dentists. He has held numerous offices in his specialty's organizations. He resides in Memphis with his wife, Beverly.

(No disclosures)

Quinton Robinson, DDS, MS

Dr. Quinton Robinson received his Doctor of Dental Surgery Degree (1984) and a Master's of Science Degree in Orthodontics (1988) from the University of Tennessee, College of Dentistry. In addition to private practice in Memphis, TN, he is an Associate Professor in the Department of Orthodontics at the University of Tennessee College of Dentistry. Prior to completing his orthodontic training, he was in private practice for 2 years in Jackson TN.

(No disclosures)

brackets, wires and elastics. Many of those patients are adults undergoing treatments, which must accommodate the lack of growth present in juvenile patients. Consequently, there is reliance on skeletal anchorage, surgical interventions and complex interdisciplinary interactions, which will include the general practitioner. Referring, planning and completing such treatments requires familiarity with the potential application and benefit of such orthodontic treatments.

LEARNING OBJECTIVES

- Have familiarity with the diagnostic considerations included in preparation for unconventional orthodontic treatments
- Have sufficient understanding of a variety of these complex treatments to discuss them comfortably with patients
- Be able to participate with greater confidence in the planning for the less conventional treatments

Tooth Structure: Nature's Best Restorative Material (Use It, Don't Lose It!)

8:30 am – 11:30 am

Course Code: 004AM / 3 hours CE

Sponsored by Kuraray America, Inc.

This course will review, in a real world “wet fingered” dentist’s way, some of the techniques, materials and key research and give an introduction of how to perform advanced adhesion dentistry simply in your office on a daily basis. With the advanced adhesion techniques available today, supported by an overwhelming amount of published science, it is now possible to mimic the bond strength of the DEJ with certain techniques and materials.

LEARNING OBJECTIVES

- Nature’s best restorative material, enamel and dentin. (How to use it not lose it)
- Technique for IDS (Immediate Dentin Sealing), “the most important advancement in adhesion dentistry”
- Create low stress-high bond strength composites. (Hint: it’s all in how you place it)
- Use nature’s best restorative in anterior traumatic cases
- Preserve & repair geriatric dentition with advanced adhesion techniques
- New technology and technique for desensitizing with long-term durability (ideal for restorative and hygiene procedures)

Cover Art by Elaine Neeley

A native of Nashville, Memphis artist Elaine Speed Neeley studied Graphic Design at the University of Memphis and earned a Masters Degree in Art Education. After teaching ten years, she turned to her own art as a full-time career. Best known for the watercolor scenes of Memphis and Nashville, Neeley enjoys working in all media and subjects including portraits, wildlife and florals, as well as her popular “skylscapes.” She is founder of the annual “Kaleidoscope” Art and Craft Sale, benefiting the local children’s hospital.

Richard Young, DDS

Dr. Young is an Assistant Professor of Restorative Dentistry at Loma Linda University School of Dentistry where he directs as well as lectures in the undergraduate dental aesthetics program. His interest in dental photography and adhesive dentistry spans the last 31 years and he is recognized worldwide for his expertise in digital photography. His innovative and practical methods have inspired countless colleagues to adopt digital photography in their practices. Dr. Young also lectures on advanced minimally invasive, tooth preserving dentistry, most recently becoming known and termed as Biomimetic Dentistry. Dr. Young maintains a private practice with his wife focusing on esthetic dentistry.

(Kuraray - Honorarium)

Dental Digital Photography for the 2016 Dental Practice

1:30 pm – 4:30 pm

Course Code: 004PM / 3 hours CE

In today’s world of visual communication attractive dental photographs, which are used to communicate with patients, laboratories, specialists, and for social media marketing, are imperative. This lecture and demonstration will present a simplified yet artistic approach to digital dental photography and will help the participants select the correct photo systems, accessories, and software. Most importantly they will learn techniques to take portrait and intraoral photos that are exciting because of their color, lighting, composition, and visual impact.

LEARNING OBJECTIVES

- The purpose of quality images in dentistry and how to achieve them
- Select photographic equipment, and accessories to help make this happen
- Use dental images in communication from the new patient experience to communicating with the lab, specialists, and social media

Medical and Dental Implications of the Most Common Physician-Prescribed Medications!

8:30 am – 4:30 pm

Course Code: 009 / 6 hours CE

Should I use caution when prescribing NSAIDs with antihypertensives? Can NSAIDs cause atrial fibrillation? Can I prescribe a NSAID to a patient who takes warfarin? Can I prescribe fluconazole, (Diflucan), for a patient taking clopidogrel, (Plavix). There are hundreds of drug interactions, but only a handful are clinically relevant.

Is antibiotic prophylaxis required for patients with orthopedic prostheses? Your patients are living longer thanks to their medications, but many of the physician-prescribed medications used by your patients have dental implications and side effects affecting your treatment plan. Some medications are more likely to cause violent behavior and others can cause, “burning mouth syndrome.”

What analgesic is the safest for a pregnant patient? This presentation includes the indications, contraindications, and side effects of the most commonly prescribed medications. Many of these medications were not approved when you took your pharmacology course in dental school. These medications represent one third of all prescriptions taken by your dental patients and familiarity with these drugs will provide the dental practitioner with a better appreciation for the health profile of your dental patient.

LEARNING OBJECTIVES

- Medications that could adversely interact with dental drugs.
- Why your patient is taking their medications
- Oral side effects caused by these medications
- Maximum doses for commonly prescribed pain medications
- When not to prescribe NSAIDs
- How to combine analgesics to maximize their effects
- Current recommendations for SBE and orthopedic prosthesis prophylaxis

Harold L. Crossley, DDS, MS, PhD

Dr. Harold L. Crossley is Professor Emeritus at the University of Maryland Dental School. A native of Rhode Island, Dr. Crossley received a Bachelor of Science degree in Pharmacy from the University of Rhode Island in 1964. He later was awarded the Master of Science, Doctorate degree in Pharmacology, and D.D.S. degree. The liaison between the classroom and his part-time dental practice produced a practical approach to understanding the pharmacology of drugs used in the dental office.

Dr. Crossley has co-authored a number of articles and four books dealing with a variety of topics within the field of pharmacology. Other areas of expertise include the pharmacology of street drugs and chemical dependency. He serves on the Maryland State Dental Association's Well-Being Committee, is an active member of numerous societies and an honorary member of the Thomas B. Hinman Dental Society. He was the recipient of the 2008 Gordon Christensen Lecturer Recognition award presented by the Chicago Dental Society and the recipient of the 2012 Award of Distinction presented by the Academy of Dentistry International for his efforts in Continuing Dental Education. He has been a consultant for the United States Drug Enforcement Administration and other law enforcement agencies since 1974. Drawing on this unique background, Dr. Crossley has become nationally and internationally recognized as an expert on street drugs and chemical dependency as well as the clinical pharmacology of dental drugs.

Tooth Bleaching: Bridging Past Knowledge to Future Treatment Options

8:30 am – 11:30 am

Course Code: 010AM / 3 hours CE

Sponsored by Dentsply Caulk

Although tray bleaching has been around for over 25 years and in-office bleaching has since enjoyed a resurgence, there are some questions that have only recently been answered by good research or long time experience. Some of these answers are contrary to typical current marketing claims, while some support those claims. This presentation will explore tray, in-office, and OTC bleaching techniques, and discuss current knowledge based on published research, as well as clinical experience, especially as that relates to children and older adults. Treatment for discolorations such as brown and white spots, single dark teeth, as well as nicotine stains and tetracycline-stained teeth will be discussed.

Additionally, the FTC has made some startling judgments concerning bleaching without a dental license in malls and salons, so this course will shed insights on the governmental impact on community situations and licensure.

LEARNING OBJECTIVES

- Bleaching examination components, plus hydrogen and carbamide peroxide differences
- Differences between tray, in-office and OTC products and techniques
- Treatment options for brown & white discolorations, plus nicotine stains
- Treatment of tetracycline-stained teeth and long-term safety
- Indications for different bleaching techniques and research support for each

Thank you to Dawn Smith for donating the time to create the flower arrangements.
dawnsmithdesigns@outlook.com

Van B. Haywood, DMD

Dr. Van B. Haywood is Professor in the Department of Oral Rehabilitation, College of Dental Medicine, Georgia Regents University. In 1989, he co-authored the first publication in the world on Nightguard vital bleaching (at-home bleaching) with Dr. Harald Heymann, and in 1997 co-authored the first article on extended treatment (six-months) of tetracycline-stained teeth using this technique. He has completed further research and over 145 publications on the NGVB technique and the topic of bleaching and esthetics, including first papers on treating bleaching sensitivity with potassium nitrate, direct thermoplastic tray fabrication, bleaching primary teeth, and caries control with bleaching materials. His book titled "Tooth Whitening: Indications and Outcomes of Nightguard Vital Bleaching," was published by Quintessence International in 2007 and is now available on iBooks.

(Dentsply Caulk – Honorarium)

Dental Materials and Techniques to Facilitate Bleaching: Smile Analysis, Bonding, Single Dark Teeth, Tray Fabrication, Sensitivity and Caries Control

1:30 pm – 4:30 pm

Course Code: 010PM / 3 hours CE

Sponsored by Dentsply Caulk

In addition to understanding the techniques and indications for bleaching teeth overall, there are specific bleaching needs to be addressed. These topics include an overview smile analysis, bonding composite restorations to the lighter teeth, appropriate tray fabrication for a single dark tooth as well as techniques for internal bleaching of endodontically-treated teeth. Also "Boil and form" tray fabrication for children, treatment of bleaching sensitivity and the new use of bleaching materials for caries control in elderly and orthodontic patients will be demonstrated.

LEARNING OBJECTIVES

- Relating the shapes of teeth to the overall smile
- Bonding tips and shades for bleached teeth
- Bleaching options for single dark teeth with internal and external stains
- Treatment for tooth sensitivity using bleaching trays and potassium nitrate
- Various tray fabrication techniques and indications - intraoral and laboratory

Delivering W.O.W. Service! People will Forget Everything Except How You Made Them Feel!

8:30 am – 11:30 am

Course Code: 011AM / 3 hours CE

Sponsored by Delta Dental of Arkansas

Research shows that practices that build their office environment around serving the patient own and dominate the market. Customer service is often confusing, complex and vague! “I’m satisfied” means nothing in today’s world. Set yourself apart from your colleagues: differentiate why you and your office and not the office down the street! Learn principles for strengthening communication skills, practice brand, and service standards. Illuminate the patient decision making processes to create lasting impressions and exceptional experiences. Inspire the entire team to deliver W.O.W. service with more passion and fun!

LEARNING OBJECTIVES

- Understand W.O.W. Patient Philosophy and Decision Making Process
- Techniques to make W.O.W. Impressions
- Recognize essentials of W.O.W. Branding
- Identify how to spot opportunities that create W.O.W. Touch Points
- Understand W.O.W. Service Standards Concept

Communication Solutions: Attitudes, Breakdowns & Conflict Resolutions

1:30 pm – 4:30 pm

Course Code: 011PM / 3 hours CE

Sponsosred by Delta Dental of Arkansas

Discover how to elevate your communication to a level that inspires open communication, prevents breakdowns, resolves conflict and builds trust and respect resulting in high performing team and patient relationships! Learn the skills to communicate positively and effectively with different and even difficult personalities. Discover formats to hold positive, effective and efficient huddles and team meetings.

Judy Kay Mausolf

Judy Kay Mausolf is a dental practice management coach, speaker and author with expertise in helping others get happier and more successful! She coaches teams how to grow their practices by becoming better leaders, working together better and delivering service with passion and fun.

She is Past President of National Speakers Association (Minnesota Chapter), Director of Sponsoring Partners for the Speaking Consulting Network, member of the National Speakers Association and Academy of Dental Management Consultants.

(Delta Dental of Arkansas – Honorarium; Author for Practice Solutions, Inc.– Financial or Material Support)

Transform attitudes from toxic to tremendous and create a positive environment where everyone looks forward to coming to the office. Judy Kay, communications expert, will share how you can elevate the level of communication in your life!

LEARNING OBJECTIVES

- Learn verbal skills to communicate effectively with difficult and different personalities
- Learn steps to address and resolve conflict and eliminate gossip
- Identify behaviors that elevate trust, respect, appreciation and celebration
- Discover methods that turn toxic attitudes to tremendous
- Learn fundamentals for effective huddles and team meetings

Uploading: Pediatric Dentistry 2.0

8:30 am – 11:30 am

Course Code: 012 / 3 hours CE

This half-day course is designed for general dentists who desire up-to-date and practical information to assist them in treating children and adolescents. An array of topics, based on the most contemporary science available, will be presented:

Behavior guidance – Has this really changed?

Preventive dentistry – The seal is the deal

Restorative materials – Is Zirconia “the new black”?

Pain management – What happened to Codeine?

Pulp therapy – To Pulp or Not to Pulp

This is a “must” course for practitioners who see pediatric patients.

LEARNING OBJECTIVES

- Propose behavior guidance techniques for clinical examples

Martha H. Wells, DMD

Dr. Wells is an Associate Professor and the Program Director of Pediatric Dentistry at the University of Tennessee Health Science Center. She is a graduate of Georgia Regents University and completed her specialty training and Master of Science degree at The Ohio State University. While serving as a research mentor for residents, she has had projects published in the Journal of the American Dental Association, the Journal of Pediatric Dentistry, and the International Journal of Pediatric Dentistry. She has served on the Board of Editors for the Journal of Dentistry for Children and currently serves on the American Board of Pediatric Dentistry's Oral Examination Committee.
(No disclosures)

- Identify approaches to prevent and manage the microbial aspects of dental caries
- Apply evidence to predict the survival rate of different restorative materials
- Describe indications for vital and non-vital pulp therapy in primary teeth
- Explain some of the errors that can lead to under-treatment of pain in children

Periodontal vs. Peri-implant Regeneration: Are they the same?

1:30 pm – 4:30 pm

Course Code: 015 / 3 hours CE

This course addresses general dentists, and specialists that offer implant dentistry as a treatment option in their practices. Peri-implant and periodontal regenerative procedures will be shown and discussed. Important factors that influence surgical outcome predictability will be presented. Furthermore, the new concepts for osseointegration and peri-implant diseases based on comprehensive biological research will be provided.

LEARNING OBJECTIVES

- Compare the histological differences between the periodontium and the peri-implant tissues
- Learn the importance of using the Pink Esthetic Score evaluation prior to regenerative procedures

Cimara Fortes Ferreira, DDS, MSc, PhD, MDS

Dr. Ferreira received her DDS from the Catholic Pontifical University of Minas Gerais, Brazil. She obtained training in minor OMFS at the Federal University of Minas Gerais. She received her specialty degree in Implant Dentistry and training in Periodontics from the University of São Paulo. She completed her MSc and a PhD in Implant Dentistry from the Federal University of Santa Catarina. She was awarded a Brazilian Ministry of Education scholarship to conduct research at Kings College London. She received an MDS in Periodontics at UTHSC. She is an Assistant Professor in the Department of Prosthodontics at the University of Tennessee College of Dentistry.
(No disclosures)

- Understand the timing for peri-implant regenerative procedures
- Learn important details necessary to increase predictability in peri-implant surgeries
- Define the new concept of osseointegration and of peri-implant diseases

Dental Hygiene Update

Sponsored by WaterPik

Morning Session

9:00 am – 12:00 pm

Course Code: 013 / 3 hours CE

Humans and Tree Trunks. This course will discuss illnesses that affect our patients with the focus on autoimmune conditions. It will deal with signs, symptoms, diagnosis and treatment of a variety of diseases. The importance of the dental professional in helping to diagnose and treat the patient cannot be stressed enough.

The discussion will include the different ways these conditions affect different people, and what they go through. Emphasis will be placed on the associated oral manifestations.

LEARNING OBJECTIVES

- A better understanding of several autoimmune conditions
- Medications used to treat several conditions

Afternoon Session

1:30 pm – 4:30 pm

Course Code: 016 / 3 hours CE

A Review of Dentinal Hypersensitivity. A common problem that presents in the dental office is dentinal hypersensitivity. This condition, however, is highly under-reported by patients or can be completely misdiagnosed. This course will prepare the dental health care professional to address the etiology, prevalence and diagnosis of dental hypersensitivity. Attendees will have the opportunity to learn the clinical evidence used behind popular desensitizing dentifrices and clinical application of other desensitizing agents that may be implemented as a form of treatment of this malady. Dentinal hypersensitivity is certainly a challenge for the dental professional.

Jane Weiner, RDH, BS

Jane Weiner graduated from the Forsyth School for Dental Hygienists, Boston, MA and received her BS degree from O’Hehir University, Phoenix, AZ. Jane was on faculty at Nova Southeastern University CDM, Davie, Florida from 1999- 2014. She has held numerous awards including: 2003 Recipient of the Dr. Esther M. Wilkins Distinguished Alumni Award, 2005 Recipient of the Philips Oral Health Care/RDH Magazine Mentor of the Year Award, 2006 Recipient of the Sunstar Butler Award of Distinction and the 2011 Outstanding Member Award from the Broward County Dental Hygiene Association.

Jane resides in Tamarac, Florida and owns Jane Weiner, RDH, Board Reviews, Inc. and is Co-owner of Dynamic Dental Education, LLC. She is the co-author of the Saunders Review of Dental Hygiene, 2nd. edition and the co-editor of the Dental Hygiene Review for Friends of Hu -Friedy. She is on the Editorial Advisory committee for RDH Magazine and presents continuing education courses around the country.

(WaterPik – Honorarium)

- Oral manifestations of several of the illnesses and the medications that are used to treat these illnesses
- A better understanding of how to treat and handle patients with autoimmune conditions

Daniel Hassler, DDSm, DHSc, MSHL

Dr. Daniel Hassler was trained in general dentistry at the Universidad Nacional Federico Villarreal in Lima, Peru. He practiced general dentistry in Lima for 15 years. In 2003, he returned to the U.S. and obtained a Master of Science in Health Law and a Doctorate of Health Science from Nova Southeastern University in Davie, FL. Dr. Hassler has always had a passion for education. He has taught dental hygiene courses throughout the years and has been the program director of a dental hygiene program in Orlando, FL and currently at Briarcliffe College in Patchogue, NY.

Making Dentistry Better, Faster, Easier and Higher in Quality

8:30 am – 11:30 am

Course Code: 017 / 3 hours CE

Modern general dentistry is not for the faint of heart. General dentists must possess an incredible amount of knowledge of different products, materials, and clinical techniques while also having the clinical skills to utilize them effectively. Add to this a flat economy and decreasing reimbursement and today's dentist finds themselves having to do more with less. Despite this, dentists shouldn't feel they have to choose between being affordable or providing high quality care. This course is packed with real world cases demonstrating that dentists can be efficient and profitable while still maintaining the highest level of quality.

LEARNING OBJECTIVES

- Learn to create predictable complete dentures in 2 to 3 visits utilizing duplicate dentures
- Discuss techniques and products that aid in restoring severely compromised teeth

Blood, Spit and Fears: A Painless OSHA Update

8:30 am – 11:30 am

Course Code: 018 / 3 hours CE

Sponsored by Ocoee Oral Surgery,

Hunter T. McCord, DDS & Paul T. McCord, DDS

Let's face it...most OSHA training courses are anything but fun. Join us for a class that will change your mind forever. It's fast, it's informative, it's fun, and it satisfies your annual OSHA requirements! We'll cover the newest infection control and HIPAA guidelines, new disease information, and other relevant regulations.

LEARNING OBJECTIVES

- Understand the importance of standard precautions and the use of PPE in the dental office
- Recognize the importance of the CDC's infection control guidelines and training for the dental health care worker
- Recognize the role of regulatory and risk management issues in dentistry

N. Cory Glenn, DDS

Dr. Glenn is a 2008 graduate of the University of Tennessee College of Dentistry. He went on to complete the AEGD residency at UT, the Georgia Maxi Course in Implant Dentistry, and the American Orthodontic Society's Comprehensive Ortho Program, and is an Associate Fellow in the American Academy of Implant Dentistry. He is the current Chairman of Continuing Education for both the TN AGD and serves on the teaching faculty for CADRAY Dental Implant Continuum. Dr. Glenn operates a private practice in Winchester, TN where he performs all disciplines of dentistry with a particular focus on complex care and the utilization of dental technology.

(3M ESPE, CADRAY, Blue Sky Bio – Financial or Material Support)

- Perform full mouth rehabilitations on any budget and how to stage treatment for comprehensive cases
- Dental implant placement simple and efficient
- Develop a system to efficiently deliver class II restorations with ideal anatomy and minimal stress
- Explore numerous dental technologies and how they can impact your practice

Laney Kay, JD

Laney Kay, JD, MPH of Entertaining Training, LLC, is a nationally known speaker and writer on technical and regulatory topics. Her expertise is in taking very complex, and/or incredibly boring, topics and making them both fun and informative. She is a featured consultant with the ADA's CELL Seminar Series and has taught courses at multiple Hinman and ADA meetings, the TBSE, the Yankee Dental Congress, the Chicago Midwinter Meeting, the Pacific NW Dental Conference, the Texas Meeting, the SW Dental Conference, plus other national, state and district meetings, study clubs and in individual offices all over the country.

- Understand updated requirements for HIPAA regulations in the dental environment
- Identify strategies that can prevent occupational exposures to blood and body fluids, ALL without being put to sleep!

Chemical Dependency: Proper Prescribing of Opiates

8:30 am – 10:30 am

Course Code: 019 / 2 hours CE

This course will provide the required 2 hours for the Chemical Dependency: Proper Prescribing of Opiates, based on the guidelines recommended by the State of Tennessee, as they pertain to the practice of Dentistry.

The Chemical Dependency lecture will focus on Addiction, Is it Really a Disease? The “Five Theories of Addiction” the effects of psychoactive substances on the brain, Epigenetics as it effects DNA, why can’t I just stop, and is there help for the addicted dental professional?

(Course meets newly adopted controlled substance CE requirement, Rule 0460-01.05, for all prescribers who hold a current federal drug enforcement administration DEA license).

Wayne McElhiney, DPh, DDS

Dr. McElhiney is a 1966 graduate of the University of Tennessee College of Pharmacy and a 1974 graduate of the University of Tennessee College of Dentistry. He maintained a private practice in Nashville, Tennessee and was appointed director of the Wellness Committee of the Tennessee Dental Association in January 2006. He is a member of the American Dental Association and has served as a consultant for ADA's Counsel of Dental Practice since 2012. He has also served on the ADA's Well-Being task force. As a faculty member of the University of Utah School on Alcoholism and other Drug Dependencies, he received the Alumni of the Year Award in 2012. He is a noted lecturer and published author and currently involved in teaching health professionals the disease concept of addiction.

Dental Hygiene Update: Applying Adult Learning and Lifelong Education in the Clinical Context: How to Interact with Patients and Clinical Students Effectively

8:30 am – 11:30 am

Course Code: 020 / 3 hours CE

Dental professionals interact with clients daily, and often times train and interact with students in the clinical setting. The purpose of this session is to provide the audience with some strategies for developing and sustaining effective relationships with adult clients and clinical students in the clinical context based on adult learning theories. First, this session will present a brief overview of adult learning theories. Then, this session will provide an opportunity for the audience to critically reflect on their role in their workplace or clinical setting using a lifeline exercise. After that, this session will provide the audience with some opportunities to share their life experiences in groups using what they learned about the theories that were addressed previously. The session will conclude with discussions on

Mitsunori Misawa, PhD, MEd

Dr. Mitsunori Misawa is Director of the Center for the Study of Higher Education and an assistant professor in the Higher and Adult Education graduate program of the Department of Leadership at the University of Memphis. His major areas of research and teaching include social justice in postsecondary education, adult bullying, workplace education, continuing professional education, policy research and program evaluation, curriculum and instruction, research methodologies (qualitative, quantitative, and mixed methods), and qualitative research (narrative inquiry, case studies, and action research). His work has been published in peer-reviewed journals and book chapters and has been presented and published in peer-reviewed conference proceedings at various national and international conferences.

(No disclosures)

some applicable strategies for dental professionals to use in their own practices to help them be able to build effective relationships with clients and clinical students and ensure their interactions produce the right amount of respect and dignity needed to inspire lifelong learners.

CPR Certification and Re-Certification

8:30 am – 11:30 am

Course Code: 021 / 3 hours CE

The CPR certification course presents the American Heart Association health care provider course and provides certification for a period of two years. The course will offer both a lecture and practice on CPR mannequins. Certification topics to be covered include background information about heart disease, risk factors, prudent heart living, heart-lung function, management of foreign body airway obstruction, and adult and pediatric resuscitation. Instruction will include a review of all background material, new material and new methods, as well as supervised mannequin and AED practice.

Morris L. Robbins, DDS

Dr. Morris Robbins is the chairman of the Tennessee Dental Association Committee on Infectious Disease. He served on the UT Health Science Center's Infection Control Committee and was appointed to the Governor's Task Force on AIDS for the state of Tennessee. After completing post-graduate study in pathology, Dr. Robbins was a faculty member at the University of Tennessee College of Dentistry from 1963 until his retirement in 2001. He has served as president of the Memphis Dental Society, the Tennessee Dental Association, and the Memphis/Shelby County Unit of the American Cancer Society. He was named 2002 Outstanding Alumnus by the University of Tennessee Dental Alumni Association. Dr. Robbins has been an instructor in CPR for several years and is also an American Heart Association Regional Faculty member.

Goodbye BRONJ, Hello MRONJ: The Interesting History of Osteonecrosis of The Jaws 2003-2015

8:30 am – 11:30 am

Course Code: 022 / 3 hours CE

Osteonecrosis of the jaws (ONJ) in patients receiving chemotherapy for malignancy or being treated for osteoporosis was first recognized in 2003. This presentation will chronicle the past twelve years and present what we have learned about the process, including diagnosis and treatment. The last portion of the presentation will address the content of the 2015 ONJ white paper from the American Association of Oral and Maxillofacial Surgeons (AAOMS). Prepared by a multidisciplinary task force representing oral and maxillofacial surgery, oral medicine, endocrinology, and medical oncology, this paper is the only official document which provides detailed guidance regarding the treatment of medication related osteonecrosis of the jaws.

Larry Weeda, Jr., DDS

Dr. Larry Weeda, Jr., Professor, Chairman of the Department of Oral and Maxillofacial Surgery, and past Director of the Residency Program in Oral and Maxillofacial Surgery, joined the faculty of the University of Tennessee College of Dentistry in January of 1998. He is a graduate of the University of Missouri-Kansas City College of Dentistry. He received his training in oral and maxillofacial surgery at the Naval Regional Medical Center in Portsmouth, Virginia, and retired from the Navy with the rank of Captain in 1998 after 27 years of service.

(No disclosures)

LEARNING OBJECTIVES

- Understand the historical evolution of our understanding of the MRONJ process
- Understand and recognize the clinical presentation of MRONJ
- Understand the clinical staging of MRONJ
- Understand the most recent treatment recommendations for MRONJ

OUTSTANDING ALUMNUS

Philip Wenk, president and CEO of Delta Dental of Tennessee, is a 1977 graduate from the University of Tennessee College of Dentistry. Even as a student, Phil showed an interest in leadership as vice president and president of the UT Student Association and a member of the Student Government Executive Council.

He transitioned from a well-honored student leader to small-town dentist seamlessly, practicing in Clinton. His community involvement there included civic organizations, local government and athletics. These roles provided the perfect training grounds for his current position, where he places strong emphasis on corporate citizenship.

Phil served in private practice until 1997, when he accepted the role of chief operating officer at Delta Dental of Tennessee, eventually moving into the chief leadership role in 2000. Among his many accomplishments with the company includes enhancing the partnership between Delta Dental and his alma mater through engagement and charitable support.

Under his leadership at Delta Dental, the company has increased revenues nearly fourfold. As a result of its success, Phil has ensured that the company maintains a focus on giving back to the communities it serves. Delta Dental has become the single largest donor to the College of Dentistry, with more than \$13 million given for capital and scholarships since 1998 by Delta Dental and its new philanthropic arm, the Smile180 Foundation, created in 2014.

Philip Wenk, DDS

The Smile180 Foundation, named for the transformative power of a healthy smile to change lives, is dedicated to providing resources for free and reduced cost clinics, children's hospitals, and the state's dental colleges. The program builds off a 2014 initiative which provided more than \$5 million to these and other community organizations. Over the past five years, the company has provided more than \$12.7 million in statewide grants and community support.

In addition to directing support from Delta Dental, Phil co-chaired the Campaign for Tennessee with former Governor Winfield Dunn, which concluded in 2011. The campaign exceeded its \$15 million goal, generating \$19.7 million for the College of Dentistry.

Phil's professional memberships include the International College of Dentists, the American College of Dentists, the Academy of General Dentistry, and the American and Tennessee dental associations. He is the board chair for the Franklin American Music City Bowl and the board chair for the Brentwood Country Club. In addition, he currently serves on boards for Monroe Carell Jr. Children's Hospital at Vanderbilt, Tennessee Performing Arts Center, and Civic Bank. He is also on a committee for the American Red Cross, Middle Tennessee Division.

Phil lives in Brentwood, Tenn., with his wife, Brenda. They have two children and three grandchildren.

OUTSTANDING ALUMNUS

A lifelong Memphian, Justin attended Memphis City Schools, Washington and Lee University, and then graduated from the University of Tennessee College of Dentistry in 1954. Shortly thereafter, he served in the Air Force for two years before returning to Memphis to practice periodontics for 44 years and teaching in the Department of Periodontics at the UT College of Dentistry for 15 years.

As author and co-author, he published several articles on clinical periodontics and occlusion as well as contributing to continuing education courses and programs. His professional memberships include Memphis Dental Society, where he served as president and received the Humanitarian Award. He also served in the Tennessee Dental Association, American Dental Association, Southern Academy of Periodontology, and American Academy of Periodontology.

Dr. Towner was one of four dentists who initiated the formation of the UT Dental Alumni Association in the early

Justin D. Towner III, DDS

1960s and served as president from 1965 to 1966. He was instrumental in establishing an annual alumni meeting, which would evolve into the Mid-South Dental Congress and today's William F. Slagle Dental Meeting.

A member of Second Presbyterian Church, he has served as elder and clerk of the Session. He enjoyed teaching Sunday school and served on numerous committees—most notably the World Missions committee—and made several trips to Haiti and Belize as a dental missionary. He is most proud of his wife of 61 years, Ginny, his three children and their spouses, and his seven grandchildren.

For Dr. Towner, the most rewarding aspect of his career is the opportunity to teach students and young dentists the importance of including the treatment of periodontal disease into their practices.
